

The Riddle of the Swapped Signs

Two hours into the race, runners in the marathon were sure they were almost at the finish line. However, after turning the final corner, they suddenly fell into a heap. Somebody must have swapped all of the signs along the route and directed the runners into a muddy ditch! As the Detective Chief Inspector on the case, it is your job to find out who caused carnage at the marathon by swapping the signs. You have taken down the names and descriptions of 25 people who started the race but didn't pass the finish line. There are also five important clues that have been discovered along the route.

To crack the case, you will need to solve each clue and check the information with the list of names. Will you be able to catch the sign swapper and stop them before they confuse any more runners?

Good luck!

Clue 1

Retracing Their Footsteps

Whilst collecting statements from witnesses, you spot distinct muddy footprints running away from the route. Re-read the witness statements you have taken. If the witness has used an apostrophe to correctly show plural possession, give the sentence a tick. If they have not shown plural possession by using the apostrophe correctly, put a cross. The number of ticks will reveal the sign swapper's shoe size.

As you follow the footprints, they lead you to a hedge. Stuck in the hedge is a piece of material which has ripped from the sign swapper's shirt. Solve the clues below, making sure to spell the answer correctly. Then, following the instructions given, find the correct letter from each word. Once you have solved all of the clues, rearrange the letters to discover the colour of the material you have found.
