Similar and different

We are all similar to each other. Find somebody else in your home and spot one way that you are similar. For example, do you both have the same hair colour? The same friends? The same toys? Now finish this sentence:

Our similarity is .....

We are all different from each other too. Find somebody in your home and spot one way that you are different. Do you both like different food? Have different coloured eyes? Enjoy different games? Now finish the sentence:

Our difference is .....

Belonging

We all belong to different groups of people. We will have similarities to others in our groups. We will also have differences too. One group of people you might belong to is your family. You might belong to your school, a religious group, a sports club, Rainbows, Beavers or lots of other groups. Pick a group you belong to and draw it here:

Showing that you belong

Lots of people wear items to show what groups they belong to. Here are 3 items that some people wear to show belonging:

School jumpers show which school people belong to.	 Lots of Sikh people wear a dagger called a kirpan. It shows that they are part of the Sikh religion.	Many Christian people wear a cross on a chain around their necks. This shows they belong to a religion called Christianity.

Odd one out

All 3 of the items are similar because they show belonging. They have some differences too. Which do you think is so different that it is the odd one out? Fill in your answers on the sheet on the next page.

To help you, here are some answers that other children gave:

The kirpan is the odd one out because it's the only one people don't have at our school.

The jumper is the odd one out because only pupils can belong to this group. You can be a Sikh or a Christian whether you are grown up or a child.

The cross is the odd one out because you wear it round your neck. The others go on your body.
